Authorization for this examiner's amendment was given in a telephone interview with Bob Webster on September 14, 2007.

The application has been amended as shown by strikethrough for deleted limitations and underline for added limitations and as is follows:

Claim 1

An LCD device, comprising:

a LCD panel;

a plurality of source drivers applying data signals to the LCD panel;

a timing controller outputting to ~~the respective~~ each source ~~drivers~~ driver at least two clock signals having different phases, the timing controller separately outputting R/G/B data synchronized with each clock signal to ~~the~~ each source ~~drivers~~ driver; and

at least two data buses transmitting the data separately output from the timing controller to the respective source drivers, respectively,

wherein the at least two data buses are connected between the timing controller and the respective source drivers, a number of the data buses are in proportion to the number of clock signals output from the timing controller, and the source drivers separately sample the data to thereby reduce electricity consumption.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach an LCD device comprising a plurality of source drivers applying data signals to the LCD panel, a timing controller outputting to each source driver at least two clock signals having different phases, the timing controller separately outputting R/G/B data synchronized with each clock signal to each source driver.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
